

Amy Müller

Personal Information:

Age: 12 years old

Birth: Germany

(Marital status: Unmarried)

Job and tasks

Amy is a young girl and attends the 6th grade of a secondary modern school. In school breaks, she enjoys playing soccer or talking with her classmates.

Characteristics

She is an open-minded young girl who was born with a dysmelia. A dysmelia is a congenital malformation of one or more limbs. Amy was born without both hands. Since she grew up with her physical impairment, she is accustomed.

Leisure activity

In her spare time she visits a workshop for disabled people. There Amy works with other children on a common project. They build a large maze of wood, which they would like to set up at the summer festival.

Needs and wishes

The fact that Amy was born without hands makes her very difficult to use a computer independently. It is particularly difficult to control web pages and to do a precise selection of web site elements, which is necessary to select the desired content. In school breaks, their classmates often exchange new videos of video platforms (e.g. YouTube). Amy's desire is to look around on video platforms (without the help of her parents) and find new funny videos, from which she can tell her classmates the next day at school.

Friends and social environment

Other children accept her handicap and they are friends.
